QualifiedLeadsX™ — Daily Technical SEO & Growth Report

Comprehensive documentation of technical QA crawl, internal linking mesh, commercial pillar publishing, and Search Console performance.

Client / Website: QualifiedLeadsX™ (qualifiedleadsx.com)	**Date of Execution:** October 29, 2026
Operating Entity: Ecom Expertz LLC (Sheridan, WY)	**Status:** 100% Completed, Verified & Pushed
Branch: origin/main (Commit 13b79d2)	**Build Quality:** 0 TypeScript Errors, 200 OK Crawl

1. Executive Daily Key Performance Indicators (KPIs)

Total Audited Routes	Crawl Status	Live GSC Impressions	Average GSC CTR	Total Pillar Guides
30 URLs	**30 / 30 (200 OK)**	**30 Impressions**	**6.7% CTR**	**11 Live Articles**

2. Technical Site Crawl & Quality Assurance (Option A)

- **Deep Route Crawl:** Automated crawler inspected all 30 routes (26 HTML pages + robots.txt + sitemap.xml + llms.txt). 100% of routes responded with HTTP 200 OK (0 broken links, 0 404s, 0 500 server errors).
- **Heading Hierarchy Check:** Verified that every single HTML page on the site enforces strictly one <h1> tag with semantic hierarchy across <h2> and <h3> tags.
- **Structured Data (Schema.org):** Verified active JSON-LD schemas across all routes (Organization, WebSite, Service, BreadcrumbList, FAQPage, Article, and CollectionPage).
- **Canonical URLs:** Validated strict canonical tags pointing to https://www.qualifiedleadsx.com/... across all production paths.

3. Critical On-Page Bug Fixes Implemented

- **Title Double-Suffix Elimination:** Resolved duplicate branding issue where subpages rendered double brand suffixes (e.g., *'Client Acquisition Funnels | QualifiedLeadsX™ | QualifiedLeadsX™'*). Re-architected metadata titles to concise, clean 55–65 character tags.
- **Marquee Image Alt Text Fix:** Fixed 9 testimonial/client photo assets inside UFSquareMarquee.tsx that were rendering with empty alt attributes. All images now carry descriptive, keyword-rich alt tags.
- **Broken Internal Slug Resolution:** Identified and corrected internal slug mismatch in appointment setting links, ensuring 100% link integrity to the WhatsApp speed-to-lead blueprint.

4. Internal Linking Architecture Mesh (Option 2)

- **Homepage Knowledge Vault Section:** Engineered and deployed FeaturedInsights.tsx on the homepage, creating a direct internal linking bridge from the high-authority homepage to the top 3 commercial pillar guides.
- **Meta Ads Agency Page Interlinks:** Installed a 3-card dedicated grid linking paid media decision-makers directly to agency pricing, in-house vs agency comparisons, and broad targeting guides.
- **Appointment Setting Page Interlinks:** Added a 3-card speed-to-lead architecture grid connecting visitors to automated qualification filters and closer frameworks.

- **Internal Link Discovery Boost:** Increased discovered unique internal link targets from 21 to 28+, systematically distributing PageRank authority across all core pages.

5. New Commercial-Intent Pillar Publishing (Option B)

- **Pillar Article Title:** *'B2B Appointment Setting vs In-House SDR Teams: The 2026 Cost, Performance & ROI Breakdown'*
- **URL Slug:** /blog/b2b-appointment-setting-vs-in-house-sdr-teams
- **Target Query Intent:** Commercial decision-makers comparing in-house SDR hiring costs against done-for-you appointment setting agencies.
- **Financial Breakdown:** Detailed analysis of fully loaded SDR costs ($114,000–$145,000/year including base salary, OTE, benefits, software stack, and turnover fees).
- **Velocity Benchmarks:** Documented 14-day agency deployment vs 96-day SDR recruiting & ramp-up curve.
- **AI Crawler Ingestion:** Added directly to public/llms.txt for ChatGPT, Perplexity, and Claude, and dynamically indexed in app/sitemap.ts.
- **Bespoke High-Res Graphic:** Generated unique 'Sales Velocity & Pipeline Dashboard' UI cover image (/images/blog/b2b-sdr-vs-appointment-setting.jpg) in QualifiedLeadsX signature dark/lime styling.

6. Google Search Console Live Telemetry & Query Verification

Search Query / Keyword	Target Landing Page	Impressions	Organic Intent
benchmark cac b2b	/blog/b2b-client-acquisition-cost-cac-benchmarks-2026	**6**	Informational / Benchmarking
qualified appointment	/appointment-setting	**3**	High Commercial Buying Intent
qualified appointments	/appointment-setting	**2**	High Commercial Buying Intent
a b2b targeted ads	/meta-ads-agency	**1**	Agency Hiring Intent
buy coaching leads	/for/coaches	**1**	Direct Purchase Intent
qualified appointment generation	/appointment-setting	**1**	Core Service Search

- **Performance Metrics:** 30 total impressions, 2 clicks, 6.7% CTR (substantially higher than 2–3% B2B agency benchmark).
- **Index Coverage Status:** 10 URLs indexed and serving live; 15 URLs in Google systems queue (7 discovered, 8 crawled prior to internal link mesh update).

7. Version Control, Safety & Remote Synchronization

- **Remote Pull & Conflict Merge:** Pulled latest remote commits from origin/main, safely merged conflicts in about and blog slug pages without code regression.
- **TypeScript Build Pass:** Ran npx tsc --noEmit with 0 compilation errors across all components, pages, and metadata.
- **Git Commits Pushed to Remote:**
- **Commit 54a3f0e:** fix(seo): remove duplicate title branding and add alt text to marquee images
- **Commit e9745dd:** merge: resolve conflicts with origin/main (keep absolute titles)
- **Commit 1583d94:** feat(seo): install internal linking mesh connecting homepage, service hubs, and blogs
- **Commit 627991c:** feat(blog): publish commercial pillar 'b2b appointment setting vs in-house sdr teams'

- **Commit 793d8d1:** docs: add Clutch and Trustpilot profile kit for AEO directories
- **Commit 13b79d2:** feat(blog): add bespoke Sales Velocity & SDR analytics cover image
- **Remote Synchronization Status:** All commits successfully pushed to https://github.com/devsynxoffical/qualifyleadsx.com.git. Working tree is completely clean.

8. Work in Progress & Recommended Next Steps

- **Hostinger hPanel Redeployment:** Trigger manual 'Deploy / Pull' inside Hostinger hPanel Node.js dashboard to serve latest commit (13b79d2) on production live site.
- **Search Console Fast-Track Indexing:** Request indexing for https://www.qualifiedleadsx.com/blog/b2b-appointment-setting-vs-in-house-sdr-teams once deployed.
- **Search Console Validation:** Click 'Validate Fix' on 'Crawled - currently not indexed' table in GSC to trigger immediate Google bot re-evaluation.
- **AEO Directory Submission:** Claim free basic profiles on Clutch.co and Trustpilot using copy-paste kit in reports/QualifiedLeadsX_Clutch_Trustpilot_Profile_Kit.md next week.
